

Share specific feedback as to why you would or would not consider participating in this project team

34 out of 34 answered

"Lots of creative development opportunities here. Smaller scale project but potential kick starter for surrounding neighborhoods. Meaningful work and would consider this team."

"Interesting area from a transportation view. Will be an interesting project - though am surprised there wasn't mention of the LCI study for the area, which could have helped accomplish some of the asks."

"Would: It's a neighborhood in need of a lot of attention. It's under-served."

Would Not: Unsure if the deliverables for this project can actually be implemented."

"The presenters' sense of neighborhood pride was very apparent in their pitch. I think the desired result of this project could help to spur economic development in the area. As such, I would consider participating in this project."

"I'm familiar with the neighborhood and the boundary challenges created when the interstate was constructed. Since then, it has been a forgotten area of Atlanta with public/private investment happening all around it. I would really love the opportunity to work with this project team to help bring a bit of light to this "landlocked" neighborhood. It has so much potential."

"The fact that so much of this neighborhood is government owned is a deterrent. This could become a thriving business district for residents of the south side but I am not confident city officials want that."

Rate the project based on clarity of pitch and communication of expected outcome
